DHOLLANDIA

APPLICATION

The **DHOLLANDIA** Sliders are safely stored underneath the chassis, making them ideal for operators that require a large platform and need frequent access to the rear door without having to move or lower the liftgate.

Sliders are equipped with **level ride + automatic tilt at ground.** Tilt cylinders allow the platform angle to be adjusted up/down depending on the slope of the ground. Operators will appreciate the ease of use vs. a fold-away; only requiring them to fold/unfold the aluminum tip section.

- **Dual lift cylinders for great load stability**
- **Fully galvanized finish - *STANDARD***
- **Level-ride with auto-tilt at ground level**
- ***NO* complicated circuits boards / sensors**
- **Hydro-motor to eliminate sliding chatter**
- **Platform angle can be adjusted up/down**
