Furniture and Moving

Combine decades of experience and a commitment to quality, and you have a furniture mover that is different -- and BETTER -- than any other on the market. From durable construction, a rugged (and easy-to-clean) laminate interior, and strategically placed tie-downs that help to protect valuable cargo, to ergonomically designed features such as non-slip step-ups, easy access grab handles, and optional interior and exterior lighting packages -- Morgan stands apart from the crowd And so will YOU.

OVERCAB STORAGE

Innovative design of our "PEAK" overcab storage compartment maximizes cargo area, and provides out-of-the-way protection for delicate cargo. Optional skylights also enhance overall visibility.

Morgan. Different. Better.

More custom configurations than any other.

UNDERBODY TOOLBOX

Morgan's optional underbody tool box supports quick and easy access to the equipment you need; and keeps tools out of the cab and cargo areas where they can cause damage.

PRE-FINISHED LINER

Provides greater strength and durability, and helps to protect both the compartment and cargo. Enhanced wood flooring is durable enough to handle heavy loads; and easy to maintain - to support a cleaner cargo environment.

PLATFORM TAILGATE

When all you need is a little more room, you have it! Morgan's innovative slide-out platform tailgate and E-track tie-down system, makes it possible to transport items that might have required a second trip – saving you time and money!

OPTIONAL DOOR AND RAMP CONFIGURATIONS

Options for door width, style and placement; as well as walk-ramp and lift-gate configurations -- make it easier (and safer) to load, unload or simply access cargo – to accommodate the changing conditions you face.

SIDE DOORS AND STEPS

Strategically placed side-doors, steps and grab handles are ergonomically designed to enhance safe and convenient access to the cargo area.

UNDERBODY RAMP STORAGE

Morgan furniture mover ramps are easy to access and easy to store under the cargo area.

Morgan makes it easy for customers to customize products to meet their unique needs through innovative design and flexibility. Options for body configurations, interior surfaces, lighting packages, door types, sizes and placements, just to name a few, ensure that Morgan provides YOU with the features and functionality you need and expect!
